

Thompson Innovative Glass achieves ISO 9001:2015 Recertification for Quality Management System.

Fenton, MI, February 21, 2024 – Thompson Innovative Glass, a fabricator of laminated safety glass, insulated glass units, and transparent bullet-resistant products for the commercial, defense, industrial, transportation, education, healthcare, and residential markets, is proud to announce that the company has earned Quality Management System - ISO 9001:2015 recertification.

ISO 9001:2015 is a globally recognized quality management standard developed and published by the International Organization for Standardization (ISO). The certification provides guidelines for creating an effective quality management system. Based on high-quality management principles, these guidelines are customer-centric with high-level involvement from the company management. The standard also provides outlines of continuous improvements based on a process-based approach.

Thompson successfully obtained recertification after undergoing a rigorous weeklong audit conducted by a third-party certifying body. Annual surveillance assessments have been a constant requirement since the company's initial certification in 2021 and, in this recent audit, Thompson demonstrated further development of its Quality Management System to adhere to the ISO 9001:2015 standard.

Tom Donovan, President of Thompson, said, "Achieving recertification of ISO 9001:2015 is exciting news, and even more welcoming given the growth of specifications demanding manufacturers meet the ISO standard. This recertification was a thorough process we had planned for, and our efforts in the initial certification made this validation very efficient. I continue to be very proud of the team at Thompson for their hard work and dedication to ensuring we work to the highest standards and deliver the best customer experience.

About Thompson Innovative Glass

Since its inception in 1989 Thompson has grown from a small local glass fabricator to now being a North American supplier of high-value, innovative glass products for the commercial, defense, industrial, education, healthcare, and residential markets. Thompson's diverse product offering includes:

- Insulating Glass for the residential and commercial markets
- Laminated and Tempered Safety Glass
