

Certificate of Compliance

Build America, Buy America (BABA) Act

To Whom It May Concern:

Thompson Innovative Glass ("Thompson") is proud to serve as a Build America, Buy America compliant manufacturer within the manufactured products category. Thompson manufactures all its products in the United States at our Fenton, MI and Jenison, MI facilities.

Thompson Innovative Glass manufactures advanced glass products including insulating, laminated, ceramic ink printed, bullet resistant, forced entry, school security, switchable, and bird-friendly glass that can either be delivered to site and assembled into a stick-built system such as curtainwall/storefront/ribbon window frames or can be assembled in a glaziers / unitizers shop and delivered to site for installation into a facade.

The uncoated and coated float glass used by Thompson Innovative Glass for these products is manufactured in the United States, and the rest of the components are either sourced domestically or utilized in the manufacturing of the final product following the guidelines set forth in the Act.

Therefore, for purposes of compliance with the Build America, Buy America Act ("the Act") Pub. L. No. 117-58, §§ 70901-52, all of Thompson Innovative Glass' manufactured products used in the project are produced in the United States. Feel free to contact us with any additional questions or concerns.

We thank you for your continued support of Thompson Innovative Glass.

Sincerely,

Jeremy Deutschmann
Chief Financial Officer
