

Founded in 1989, we've built a reputation for quality, reliability, and technical expertise. As an ISO 9001:2015 certified company and proud member of both the Guardian Select® Program and the Vitro Certified® Network (CFP), our commitment to quality runs deep. Innovation isn't just part of our name —it's the driving force behind everything we do.

The background image for the Defender Security Glass section shows an office environment with several people working at desks. In the foreground, a woman is looking at a document. In the background, another woman is working at a desk. The office has large windows and modern decor.

Defender Security Glass

Defender by Thompson Innovative Glass is our trusted line of ballistic and protective glazing, engineered to meet demanding security requirements without compromising aesthetics. Ballistic and forced-entry testing is conducted at independent accredited laboratories and organizations. These high-performance glazing solutions are trusted in government buildings, financial institutions, data centers, and other high-risk environments where both strength and clarity matter.

Laminated Glass

Thompson Innovative Glass produces laminated glass using advanced lamination and autoclave technology. A wide range of different interlayers are available to achieve specific aesthetic and performance characteristics. Our architectural laminated glass is used for Hurricane Impact, Railings, Acoustic, Security and Overhead Glazing.

Printed Glass

Silkscreen printing on glass is commonly used when the pattern is an easily repeatable single color and for large quantity. Additionally, Thompson Innovative Glass offers digital printed glass for smaller runs and intricate designs. Both methods use specialized ceramic frit inks that get fused into the glass during the tempering process. Printed Glass is commonly used for decoration, glare reduction, thermal comfort, privacy and in transportation glass applications.

School Security Glass

School Defender, a specialized extension of our Defender line, is built with the safety of students, teachers, and administrators at its core. Designed specifically for educational facilities, this product undergoes some of the most stringent ballistic and forced-entry testing in the industry to ensure top-tier protection. Engineered for durability, visibility, and seamless integration into school architecture, School Defender delivers both security and peace of mind when it's needed most.

Bird Friendly Glass

Thompson Innovative Glass Bird Friendly offers one of the most complete and versatile lines of bird-safe glazing solutions available today. From acid-etched patterns and ceramic frit to UV-reflective coatings and specialized laminated interlayers, our portfolio is designed to meet virtually any specification. As concern for bird collisions grows, we're proud to support architects, building owners, and communities with solutions that prioritize both environmental responsibility and visual performance.

Insulated Glass

Thompson Innovative Glass manufactures Double or Triple paned/glazed insulating glass (IGU). This is a type of window or glazing system is designed to enhance energy efficiency and thermal insulation. It consists of two or three glass panes separated by a spacer, with a sealed air or gas-filled space in between.

Why choose Thompson?

We've been trusted to supply materials on thousands of projects over the years. We know finding a partner you can trust is a huge deal. What sets us apart?

1. One-stop shop

We are a Full-Service Fabricator featuring both commodity and specialty products.

2. High Quality

Featuring two State-of-the-art manufacturing facilities and multi-step inspection procedures + ISO 9001- certified Quality Management Systems, we guarantee high quality.

3. Fast Lead-times

We recognize the pressures in getting your materials when you need them and offer best in industry order turnaround times.

4. Competitive Pricing

We are constantly optimizing our operation, translating to zero downtime and lower overhead, resulting in very competitive pricing for you.

5. Strong Supply Base

Backed by decades of trusted relationships, we maintain a strong and reliable supply base that ensures consistency, quality, and responsiveness.

6. Active Industry Participant

As active members of the National Glass Association, our team contributes to task groups, code development, and industry committees that help shape the future of architectural glass.

7. A Partner, not just a supplier

We partner with our customers. We offer advice, onsite visits, and informational presentations to ensure you have the best solution for your project.
